Terms and Conditions

1. Purpose and Intended Use

- Company-issued IT assets (e.g., mobile phones, SIM cards, laptops, desktops, and other IT equipment) are work tools provided at the discretion of the company to support business operations.
- These assets may be modified, replaced, or revoked by the company at any time.
- Employees must use assigned assets strictly for business purposes only and are responsible for their proper care and security.
- The Company retains ownership of these assets, as well as those introduced therein after its issuance.

2. Usage and Cost Control

- Employees must follow assigned mobile plans and IT policies as set by the company.
- Any charges exceeding the allocated mobile plan (e.g., additional data, calls, or SMS) will be charged to the employee unless justified for business use and approved by the department head.
- International roaming activation requires prior approval from IT and Finance.
- Employees must not install unauthorized software, alter system configurations, or misuse company IT assets in any way that may compromise security, performance, or compliance.

3. Asset Management & Security

- Assigned IT assets must not be transferred, lent, or shared without prior IT approval.
- Loss, theft, or damage must be reported immediately to IT.
- Employees are financially responsible for the replacement cost for lost or damaged devices, SIM cards, or other IT assets due to negligence.
- Repairs beyond warranty coverage will be shouldered by the employee unless covered by company policy. These repairs shall first be assessed by the ICT department, and charges will only be applied if negligence is found on the part of the employee.
- Employees must follow IT security policies and take appropriate measures to protect company data and equipment from unauthorized access or misuse.

4. Return and Clearance Process

- Upon resignation, termination, or reassignment, employees must return all issued IT assets (e.g., mobile phone, SIM card, laptop, desktop, accessories) on their last working day.
- It is the responsibility of the employee and their immediate supervisor to ensure a proper handover of files and accountabilities before turnover.
- ICT will not be responsible for retrieving, managing, or storing employee files. Employees must ensure all files are backed up and endorsed to the appropriate personnel before returning the device.
- ICT will only process clearance and redeployment once the asset has been formally turned over.
- Failure to return company assets will result in the corresponding replacement cost being deducted from the employee's final salary.

5. Policy Compliance

- Any violation of this agreement, including unauthorized use, excessive personal charges, failure to return assets, or security breaches, may result in disciplinary action.
- Employees must adhere to IT security, data protection, and acceptable use policies when using corporate IT assets and services.

I understand and agree to comply with the Terms and Conditions outlined in this agreement. I accept full responsibility for the issued assets and any associated costs as stated in company policies that may apply.

I further authorize MIESCOR to deduct from my salary the costs of repair or replacement of assets damaged or lost due to my own negligence. If applicable, I also authorize MIESCOR to deduct from my salary all unauthorized excess charges in the Company mobile communication plan assigned to me.
